

The Glion Colloquium

1998 - 2023

Already 25 years!

1998

2023

THE GLION COLLOQUIUM...

- is a **think-tank** that brings together **20 university presidents**, active or recently retired, from well-known or particularly innovative universities, as well as **personalities from the world of business or politics**.
- Over a period of three to four days in an environment that is particularly conducive to open and frank discussion, **they examine the role, responsibilities and difficulties of research universities** at a time of accelerating change and mutation.

In 25 years, from 1998 to 2023,

- **14 colloquia** have been held with more than **300** participants representing more than **140 institutions**,
- **14 books** with **280 chapters** have been published and
- **2 declarations** have been widely distributed.
- **30 guest speakers** have included Nobel Laureates, Fields Medalists, astronauts, CEO's, heads of governmental and non-governmental organisations, members of governments.

And, most importantly, the discussions and conclusions benefited not only the participants but a much wider audience thanks to:

- the copies of the books distributed to a wider interested public (about five thousand),
- and the Colloquium website, which published the PDF of the full text of the 14 books and 2 declarations.

See www.glion.org

The Glion Colloquium 1998 - 2023 Already 25 years!

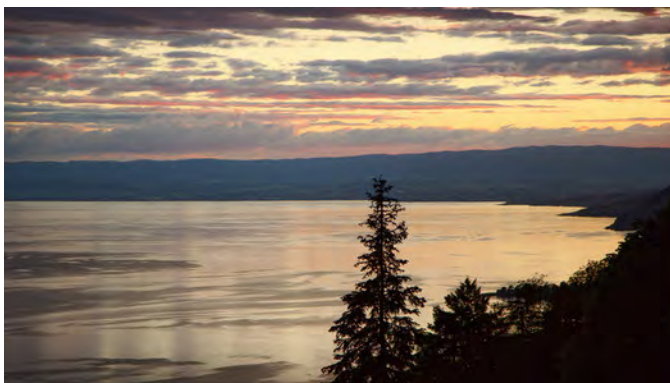

I organised the first Glion Colloquium in May 1998 in Glion-above-Montreux, Switzerland, 25 years ago. Since 1998, 14 colloquia have been organised.

I feel that the story of this initiative - a real adventure for me - has gained enough visibility in the world of higher education and research to be told, given the quality of the participants who have taken part in this global exchange on the future of research universities. It is my wish to honour and thank them with this magazine.

Every two year, 20 to 25 men and women met, worked, interacted and socialised around their passion: research universities. While the Glion Colloquium's publications and website (www.glion.org) disseminate the results of their work and meetings, this magazine presents the living history of the 14 Glion Colloquium through the lists and pictures of its participants. It is divided into three parts: 1) the birth and development of the Glion Colloquia; 2) the participants of each Colloquium and 3) an appendix with some synthesis documents.

The Birth and Development of the Glion Colloquium

The Founding Idea

The idea of creating a think tank where North American and Western European university leaders could exchange views on the future and responsibilities of research universities emerged from a series of discussions I had with my colleague Werner K. Hirsch, who invited me to UCLA for the academic year 1987-88 and again for the summer term of 1989.

But, concrete discussions on the organisation of a first colloquium did not take place until the summer of 1995, after my mandates as Rector of the University of Geneva and President of the Swiss 'Rectors' Conference. My early but strong involvement in the activities of the International Association of Universities (IAU) and the Confederation of European 'Rectors' Conferences convinced me of the need for an international exchange of views and experiences, especially for the leaders of strong research universities. Werner Hirsch and I developed and agreed on a model for the colloquium with the following main features:

a) Bringing together 20 to 25 active or recently retired university leaders (presidents, rectors, vice-chancellors) from leading or particularly innovative institutions, together with a few business and political leaders, initially focusing on North America and Western Europe, to meet for four days to openly exchange views and propose solutions to ensure that research universities adapt to their rapidly changing environment and fully assume their responsibilities to society. In line with the profound trend towards globalization that began in the 1990s, the Colloquium has become global since its sixth edition in 2007.

b) To hold the Colloquium in an attractive and comfortable hotel to ensure that participants feel well and enjoy the location, and are therefore more likely to engage in open discussions and network with other participants.

c) Invite the partners/companions of the participants. Organising a special social programme for the accompanying persons and including them in meetings with guest speakers or visits to places of general interest will reinforce this "family" feeling.

d) Deeply convinced that the discussions and conclusions should benefit a much larger number of people, the proceedings of each colloquium must be made available to all those potentially concerned. This means the publication of a book by a publisher and, later, the posting of the book on a dedicated website and other social networks.

Werner Hirsch and Luc Weber

The first meeting took place in May 1998 at the Hotel Victoria in Glion-above-Montreux, Switzerland, on the shores of Lake Geneva, just before the World Conference on Education organised by UNESCO in Paris. This led the participants to publish a declaration entitled “The University at the Millennium”, written on their behalf by Prof. *Frank H. T. Rhodes*, President Emeritus of Cornell University, which was distributed at the World Conference and elsewhere.

Less than a year later, *in January 2000*, a second meeting was held in La Jolla, Southern California, where it was decided that the Colloquia should have a permanent home in Switzerland.

The indispensable support

Organising a four-day colloquium with 20-25 university leaders from renowned universities in an excellent environment and publishing the proceedings with a commercial publisher and online requires strong support from respected personalities and financial institutions. This is necessary in order to:

- ♦ Identify the appropriate participants and convince them that the project is not only serious but is also a unique learning opportunity for them,
- ♦ Identify potential sponsors and help us convince them that this is a serious undertaking that deserves their support,
- ♦ Organise the colloquium, both before and during the meeting,
- ♦ Find a suitable publisher and edit each paper before publication,
- ♦ Create and manage the legal structure - the non-profit making “Association Glion Colloquium” - necessary to give the initiators an official personality and to be exempt from any income or wealth tax.

This «business model» proved to be excellent as the Glion Colloquia flourished and are still very attractive 25 years later.

In line with the development of the project, we can identify three phases.

Phase one (from the planning of the first colloquium in the second half of 1990 to the publication of the book resulting from the third colloquium in 2002) Werner Hirsch and I could not have successfully launched the first colloquium, organised a second one in Southern California and secured the organisation of a third one in Glion above Montreux without the particularly committed support of six personalities:

David Gardner

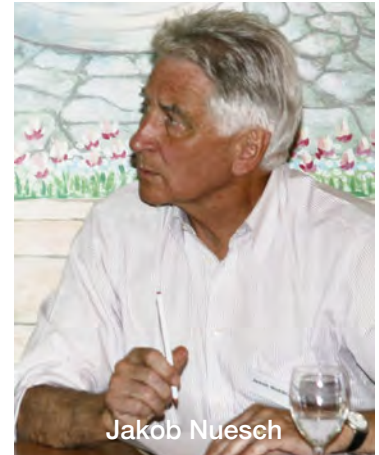

- ♦ Prof. Jakob Nuesch, President Emeritus of the Swiss Federal Institute of Technology in Zurich (ETHZ), helped me to support the project in German-speaking Switzerland and in some foundations,

- ♦ Prof. David Gardner, President Emeritus of the University of California system and at that time President of the William and Flora Hewlett Foundation, not only gave us useful advice on the programme, but also ensured that the Hewlett Foundation would generously support the first two colloquia financially

- ♦ Prof. Frank H. T. Rhodes, President Emeritus of Cornell University, who, on behalf of all the participants, drafted a first brilliant Glion Declaration, "The University at the Millennium", and helped to promote the Think Tank,

- ♦ Prof. Charles Kennel, Director of the Scripps Institute of Oceanography in La Jolla, Southern California, and Dr Peter Preuss, Member of the Board of Regents of the University of California System, who led the local organisation of the second Glion Colloquium in La Jolla.

- ♦ Prof. Howard Newby, Vice-Chancellor of the University of Southampton and later Executive President of Universities UK, supported me from the first meeting and on many other occasions.

Jakob Nuesch

Frank Rhodes

Charles Kennel

Howard Newby

Peter Preuss

Phase two (from the early organisation of the 4th Colloquium in 2003 to the 11th Colloquium in 2017)

♦ The organisation of the 4th Colloquium in 2003 brought the first test of the soundness of the leadership of the Glion Colloquium, as my colleague Werner Hirsch asked to be replaced. Fortunately, I was able to persuade Prof. James Jim Duderstadt, President Emeritus of the University of Michigan - who had attended the first three meetings -, to join me in the leadership role. His involvement was instrumental in increasing the participation of a strong North American delegation.

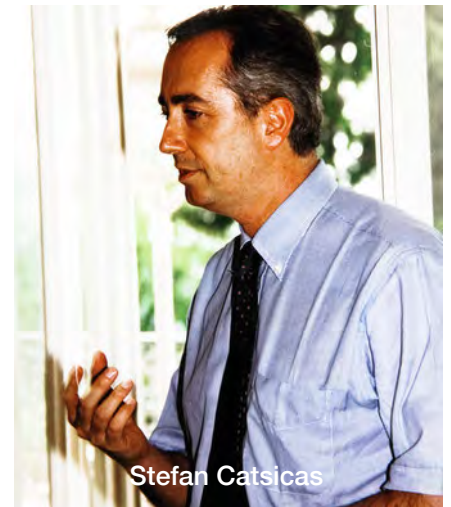

Jim Duderstadt

In particular, this fourth meeting, like the previous three, benefited from strong financial support from Hewlett Packard's headquarters in Palo Alto, California, in direct response to our 2001 invitation to Michel Benard and Wayne Johnson, who were responsible for university-industry relations in Europe and worldwide respectively.

Michel Benard and Wayne Johnson

♦ The 11th and 12th Colloquia, in 2017 and 2019 respectively, did benefit from the participation of Prof. Stefan Catsicas, Vice-President of the Federal Institute of Technology in Lausanne (EPFL) fifteen years before at the 3rd Colloquium in 2001. He has been instrumental in developing a financially interesting partnership with Nestlé when he became Chief Technological Office of the multinational company based in Vevey.

Stefan Catsicas

Michael Schaepman

♦ Finally, and thanks to the strong support of Prof. Michael Schaepman, President of the University of Zurich, who introduced the Glion Colloquia to IBM Research, both IBM Research Zurich-Rüschlikon and the Thomas J. Watson Research Centre in the USA have generously contributed to the financing of the 14th Glion Colloquia.

Yves Flückiger

Phase three (2017 onwards, successful continuation with a progressively new leadership team)

Having been the driving force behind the Glion Colloquium since 1997, I wanted to be replaced as President of the organising body - the Association Glion Colloquium - by someone younger and with the benefit of today's contacts. I am very happy that Prof. Yves Flückiger, Rector of the University of Geneva (later elected President of the Swiss Universities and of the League of European Research Universities (LERU)), agreed to take over my role. We agreed that I would remain Treasurer of the Association and that I would continue to organise the 2019 Colloquium. This means that he has effectively taken the lead in planning the 2021 Colloquium.

Gerlinde Kristahn

As an active Rector, it is clear that a staff member had to be recruited to ensure the organisation of the forthcoming Colloquia. In 2017, the Association recruited Mrs Gerlinde Kristahn, PhD in Intercultural Communication, as deputy and promoted her to Secretary General for the organisation of the 2021 Colloquium.

Howard Newby

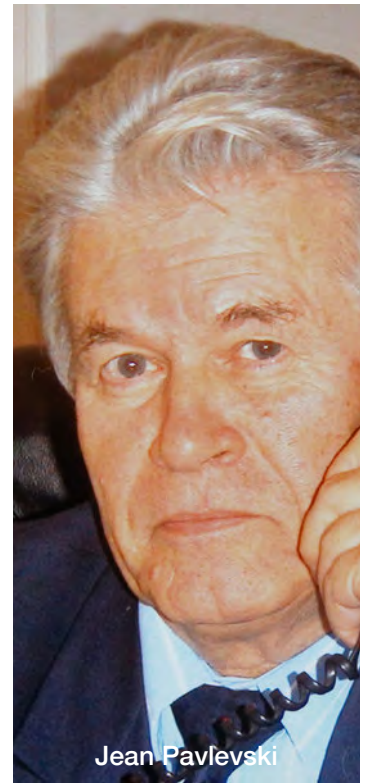

Bert van der Zwaan

This double change was accompanied by a third. Jim Duderstadt, who had played a very active role since the 4th Colloquium in 2003, also asked to be replaced. As a first step, Prof. Howard Newby, Vice-Chancellor of the University of Liverpool, who had been an active participant since the first Colloquium, joined me in organizing the 2017 Colloquium and the editing of the proceedings. Prof. Bert van der Zwaan, Rector of the University of Utrecht, did the same for the 2019 Colloquium.

With regard to the publication of books resulting from the colloquia, Prof. Stan Ickenberry, President of the American Council of Education (ACE), was the first to suggest the publication of the first book in the ACE "Series on Higher Education" to be marketed by Pergamon Press. Our important goal of making the Glion discussions available to a wider audience was then taken up by the French publisher ECONOMICA and its founder and director, Prof Jean Pavlevski. ECONOMICA published 9 volumes before we decided to take advantage of the new technologies and in particular the "print on demand" solution, which allowed us to significantly reduce the costs of publishing and mailing copies of the book.

Stan Ickenberry

Jean Pavlevski

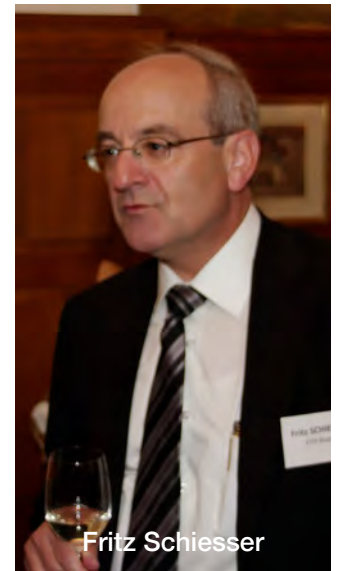

Patrick Aebischer

Michael Schaeppman

Michael Hengartner

Fritz Schiesser

Many others have contributed to the success and development of the Glion Colloquia over the past 25 years. Among the leaders of Swiss universities whose support has made a difference, I am pleased to mention:

- ♦ Dr Fritz Schiesser, President of the Board of the Swiss Federal Institute of Technology,
- ♦ Prof. Patrick Aebischer, President of the Swiss Federal Institute of Technology in Lausanne (EPFL),
- ♦ Prof. Michael Hengartner, President of the University of Zurich, now President of the ETH Board, and more recently
- ♦ Prof. Michael Schaeppman, President of the University of Zurich.

This magazine is obviously not the place to comment in detail on the financing of the Glion Colloquia. Suffice it to say that the donors are extremely diverse in terms of country of origin and legal form, and that the amounts they donate vary greatly (from CHF 2500 to several hundred thousand). In short, the main donors are American companies and foundations, the Swiss authorities (the State Secretariat for Education, Research and Innovation (SERI) has supported all the colloquia since 1998), leading Swiss universities and a Swiss multinational company (see the table of logos at the end of the magazine).

François Grin

Mary O'Mahony

Gerry Taggart

Eddie Doogue

I am pleased to mention some other personalities who have contributed to the editing of the books, either by assisting the editors in drafting the summary and conclusions, or by proof-reading the final chapters. These are Mrs Mary O'Mahony, then Deputy Secretary General of the European Rectors' Conference, who did both in the early years, and Mr Eddie Doogue, Editor of Rolex Publications, who has edited all the books since 2003. Dr Gerry Taggart on three occasions and Dr François Grin also helped to summarise the debates of the early colloquia.

Of course, all this help was a necessary but not a sufficient condition for success.

In particular, I would like to thank all the participants who, through all these years and numerous meetings, have made this adventure possible. They gave their work, their time, their personal commitment, their enthusiasm, their openness and their generosity. They made it a success. My thanks go to them all.
and

Marianne Weber

The whole endeavour became one of my main activities, alongside my teaching and later my involvement in the activities of world or European higher education organisations and universities. I am particularly proud of the strong support I received from my family and friends. My wife, Marianne, played a crucial role in making the Colloquium a pleasant stay for participants and companions, and our two boys, Nicolas and Christophe, both university students at the time, were deeply involved in the smooth running of the Colloquia. They also developed the first website, took photographs and later helped me to improve the settings, using their own connections and experience.

Nicolas and Christophe Weber

Some young friends also joined in this friendly support. First of all, Mrs Natacha Durand, in charge of student affairs at the Graduate Institute of International Studies and later at the University of Geneva, managed the Glion office for 7 colloqui

Natacha Durand

Martina Trucco

The others were Mrs. Martina Trucco (three times), Mr. David Maradan, Mrs. Catherine Gardel, Anne-Sophie Benz, Roxana Bota, Manuela Wullschleger and, more recently Mrs Luciana de Souza and Victoire Berrebi.

Catherine Gardel

Manuela Wullschleger

David Maradan

Anne-Sophie Benz

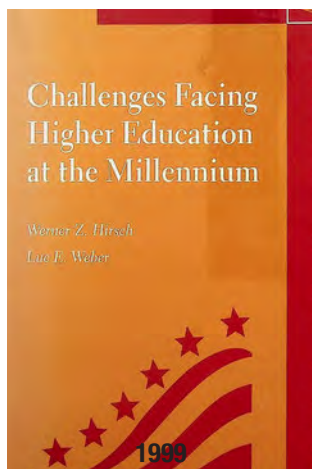

Luciana de Souza and
Victoire Berrebi

Last but not least, I am happy to point out that almost everyone in this photo-magazine, participants, companions and collaborators, looks very happy to be there and to be working during the lively sessions as well as during the periods of socialisation.

Thank you all.

Extracts from The Glion Declaration, “The University at the Millennium”

The new millennium, into which we move and which our children will inherit, confronts us with a bewildering mixture of promise and threat. On the one hand, we glimpse the promise of revolutionary advances in biomedicine, communications, information technology, alternative energy sources, new materials, automation and globalization; on the other hand, we contemplate the looming threats of balkanization, tribalism, terrorism, sectarianism, north-south inequalities, hunger, the intricate balance between population, resources and environment, the challenge of sustainable development and the relationship of all these to the future of traditional nation-states. And, if the balance between promise and threat is unclear, what is clear is that the essential key - though not the only key - to human well-being in this daunting newworld is knowledge.....

.....The university is one of the greatest inventions of the present millennium: although created more than nine centuries ago, it remains one of the glories of human aspiration and one of the triumphs of the power of imagination. We, as members of its community of learning, challenge it to play a transforming role in society, and thus to transform itself.....

.....To the university: a call to imaginative boldness and responsible freedom

Universities are learning communities, created and supported because of the need of students to learn, the benefit to scholars of intellectual community, and the importance to society of new knowledge, educated leaders, informed citizens, expert professional skills and training, and individual certification and accreditation. Those functions remain distinctive, essential contributions to society; they form the basis of an unwritten social compact, by which, in exchange for the effective and responsible provision of those services, the public supports the university, contributes to its finance, accepts its professional judgment and scholarly certification, and grants it a unique degree of institutional autonomy and scholarly freedom. Within this compact, the university has a reciprocal obligation for impartial scholarship, the highest professional competence and integrity, the cultivation of advanced knowledge and a love of learning among its students, and a sensitivity towards the need for its services in society at large.

The situation confronting all nations - both industrialized and developing - now requires, as never before an informed citizenry, an educated workforce, skilled in handling changing and increasingly sophisticated tasks, and this, in turn, requires not only achieving an optimum level in student enrolment, but also the means of providing and pursuing life-long learning. At the very time of these new demands, the universities are experiencing severe financial constraints, with increasing competition for scarce public funds for other pressing public needs. Yet these other social needs demand, in turn, a renewed public investment in higher education, as the need increases for creative solutions to social problems, sustainable development and the expansion of skilled professional services. Wise political leadership will be required to sustain long-term investment in learning, without which social advancement is an empty dream.

We call on our colleagues in the universities

to recognize their unique responsibilities and opportunities to their communities, regions and the larger global society by:

Their affirmation that teaching is a moral vocation,.....

Their affirmation that scholarship is a public trust.....

Creating new intellectual alliances within the university and new partnerships outside it.....

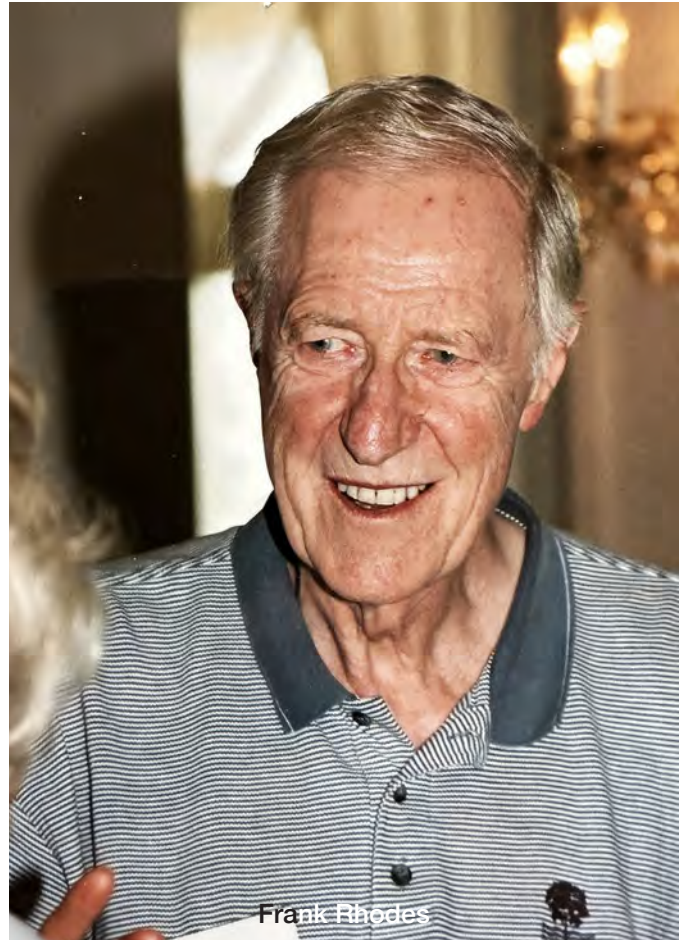

Employing new information technology (IT).....

Recognizing public service.....

Providing new structures, flexible career paths and selective support.....

Developing new patterns of governance, leadership and management.....

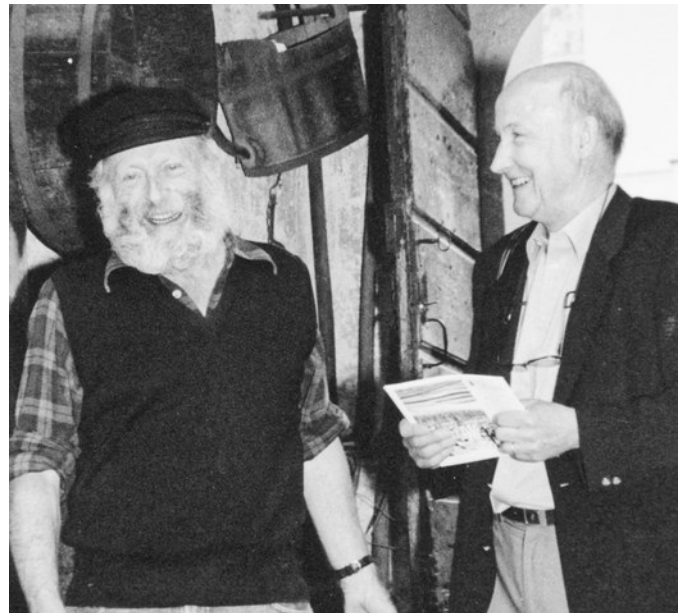

Affirming the ancient values...

For 900 years of the present millennium, the university, as a community dedicated to those values has served society well. Its effectiveness in the new millennium will depend on its reaffirmation of those ancient values as it responds creatively to the new challenges and opportunities that confront it. This is the moment for both society and the university to reaffirm the social compact, on which the future of all our peoples will so largely depend, and for their leaders to work together towards the achievement of their common goals.

Evening at the campus of IMD. Guest speaker: Peter Brabeck, CEO Nestlé.

Patrick Aebischer

2008

6th Colloquium, 2007

STEERING COMMITTEE

James J. DUDERSTADT, President Emeritus, University of Michigan, Co-chair
Brenda GOURLEY, Vice-chancellor, Open University
Peter LORANGE, President, IMD Lausanne
Howard NEWBY, Vice-chancellor, University of West of England
Dennis TSICHRITZIS, past Vice-president Fraunhofer
Chuck B. VEST, President Emeritus MIT, President National Academy of Engineering
Luc WEBER, Rector Emeritus University of Geneva, Co-chair
Bob ZEMSKY, Professor, University of Pennsylvania

PARTICIPANTS

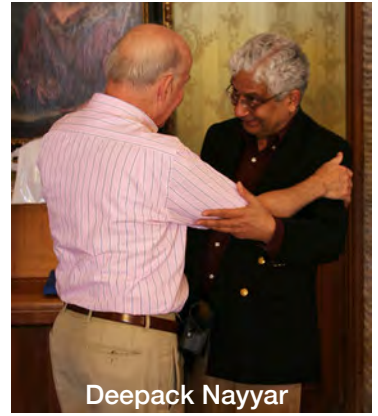

Patrick AEBISCHER, Switzerland, President EPFL
Bob BERDAHL, USA, President Association of American Universities (AAU)
Carlos H. de BRITTO-CRUZ, Brazil, Director State of Sao Paulo research foundation
Jim DUDERSTADT, USA, President Emeritus, University of Michigan
Brenda GOURLEY, United Kingdom, Vice-Chancellor Open University
Yuko HARAYAMA, Japan, Professor, Member of the Council for Science and Technology Policy, Government of Japan
Wayne JOHNSON, USA, Vice-President University-relations, Hewlett-Packard
Peter LORANGE, Switzerland, President IMD
Deepack NAYYAR, India, Former President University of Dehli, Member of the National Knowledge Commission in India
Howard NEWBY, UK, VC University of West England, Former Head of HEFCE
John NILAND, Australia, Former Vice-Chancellor and President New South Wales University
Carl SCHRAMM, USA, President Kauffman Foundation
Nam-Pyo SUH, Korea, President KAIST
Vladimir TROYAN, Russia, Former Vice-rector for Research, University of Saint-Petersburg
Dennis TSICHRITZIS, Germany, Professor, former Vice-President Fraunhofer
Chuck VEST, USA, President Emeritus MIT, President National Academy of Engineering
David WARD, USA, President American Council on Education (ACE)
John WATERBURY, Lebanon, President American University in Lebanon
Georg WINCKLER, Austria, Rector University of Vienna and President EUA
Luc WEBER, Switzerland, Rector Emeritus University of Geneva, President CDESR, Council of Europe
Toni Tan Keng YAM, Singapore, President National Research Foundation (and later President of the Republic of Singapore)
Bob ZEMSKY, USA, Scholar, UPenn
Jie ZHANG, China, President Shanghai Jiao Tong University

STEERING COMMITTEE

James J. DUDERSTADT, President Emeritus, University of Michigan, Co-chair
Chuck B. VEST, President National Academy of Engineering
Luc WEBER, Rector Emeritus University of Geneva, Co-chair
Georg WINCKLER, Rector University of Vienna, President EUA

PARTICIPANTS

Arif AL HAMMADI, President a.i. Khalifa University of Science, Technology & Research (KUSTAR), Abu Dhabi
Bertil ANDERSSON, Provost Nanyang University of Technology, Singapore
Michel BENARD, Director, HP Strategic University Research Collaborations Worldwide
John Seely BROWN, Former Chief Scientist Xerox PARK, advisor to the provost, University of Southern California (USC)
Jean-Lou CHAMEAU, President Caltech
Michael CROW, President Arizona State University
Juan R. De la FUENTE, Former President National University of Mexico (UNAM)
Gururaj DESHPANDE, ("Desh"), IT entrepreneur
J. J. DUDERSTADT, President Emeritus, University of Michigan
Ralph EICHLER, President Swiss Federal Institute of Technology, Zurich
Stu FELDMAN, CTO of Google, past Vice-President IBM
Ellen HAZELKORN, Director of Research and Enterprise and Dean of the Graduate Research School, Dublin Institute of technology
Bernd HUBER, President Ludwig Maximilian University, Munich and president of LERU
Wayne JOHNSON, Past Vice-President HP University relations World Wide
Dieter LENZEN, President Free University of Berlin
Heather MUNROE-BLUM, Principal, McGill University
Frank RHODES, Past President Cornell University
Jamil SALMI, World Bank, Tertiary Education Coordinator
Nam-Pyo SUH, President Korea Advanced Institute of Science and Technology (KAIST)
Fawwaz ULABY, Provost King Abdullah University of Science and Technology (KAUST)
Frans Van VUGHT, Rector Emeritus, University of Twente, adviser to the president of the European Commission for Higher education
Chuck VEST, President US Academy of engineering science, past President MIT
Luc WEBER, Rector Emeritus, University of Geneva, Founding Board Member European University Association (EUA)
Georg WINCKLER, Rector University of Vienna, former president European University Association (EUA),

GUESTS SPEAKERS and HOSTS

Rajna GIBSON, Professor of Finance
CERN Geneva and Professor Maurice BOURQUIN, Co-initiator of the Alpha Magnetic Spectrometer AMS-02
